

MULTI-POINT LOCKS – 2 & 3 POINT

No. 2500-U

No. 2500

- Lightweight 16-gauge steel channel is as strong as rod, but offers significant cost savings.
- Riveted, long-wearing nylon rollers are extra-large diameter (1-1/4") to provide firm, snug closure.
- Easily installed on any metal cabinet (including NEMA) 72" or shorter.
- Will accept any handle with 5/16" square shank, threaded or not. Handles are available.
- Comes complete with two L-brackets for bolting or welding and center cam latch.
- 36" rod is standard on **No. 2500**. When 48" rod is desired, specify **No. 1-2500-U**.

Finish: Zinc-plated with yellow chromate

No. 2500-1

A sturdy latch activated by any handle with 5/16" square shank. Two additional rods, channels or cable may be attached for multipoint latching.

Finish: Zinc-plated with yellow chromate
Weight: .21 lbs.

No. 9-2500-1

Offset Striker

Similar to No. 2500-1 except cam is .36" longer.

No. 2500-1

No. CL1-3700-1

Universal center latch similar to 2-2500-1. No need to order right or left.

Finish: Zinc-plated with yellow chromate
Weight: .31 lbs.

No. CL1-3700-1

No. 3-2500-51

No. 3-2500-51

Roller Pawl Center Latch

A unique variation on the No. 2500-1 center latch. The nylon roller allows smoother, more noise-free action. In addition, the roller can be adjusted for precise fit.

Finish: Zinc-plated with yellow chromate
Weight: .22 lbs.
