No. 1-5974-SSPK

Back-to-back multipoint paddle latches are ideal for vehicle or enclosure applications. System can be locked or unlocked from the inside or outside. Systems are available for different thicknesses and feature a tamper-resistant blind mount on the outside. Black textured powder coat finish is standard, but polished stainless steel is available. System is shipped loose with two gaskets. Cables or rods can be added to lever arms to create multipoint locking system with rotaries or end bolts.
