

LID SUPPORTS

16-5/8"x1-1/4" Zinc Plated(2C) Heavy Folding Table Leg Brace – 495680

Product Details

Length..... 16-5/8",422.28mm
Width..... 1-1/4",31.75mm
Class..... **446**
Finish..... 2C
Finish Description Zinc Plated

Features and Benefits

- Extra heavy brace is ideal for use on tables with folding legs
- Designed with a positive, easily operated locking feature
- Legs lie flat against table when legs are folded
- Steel construction for added strength
- Right hand or left hand identified on brace leg
- Set includes one right hand and one left hand brace (with screws)

13-1/2"x5/8" Zinc Plated(2C) Folding Table Leg Brace – 496080

Product Details

Length..... 13-1/2",342.9mm
Width..... 5/8",15.88mm
Class..... **446-1/4**
Finish..... 2C
Finish Description Zinc Plated

Features and Benefits

- Brace can be used on folding legs of tables
- Positive locking feature is easily operated
- Legs are braced in open position – lay flat against table in closed position
- Right hand or left hand identified on brace leg
- Set includes one right hand and one left hand brace (with screws)

Center Mount Antique Brass(F8) Safety Lid Support – 800447

Product Details

Class..... **CD447**
Finish..... F8
Finish Description Antique Brass

Features and Benefits

- For use on storage containers where holding lid in open position is desired
- May be used on toy chests, tool boxes and other furniture items
- For center mounting applications only

Door Stop Kit

DOOR STOP KIT

Catalog No.

Description

NH-45005	Door Stop Kit - Type 4/12 - Pltd. - Y
NH-45010	Door Stop Kit - Type 4/12 - T304SS
NH-45013	Door Stop Kit - Type 4/12 - T316SS

Application

For use on most standard TYPE 4 and TYPE 12 enclosures.

Design

The Door Stop Kit is designed to secure the door in an open position. It may be installed on the top or bottom of the door frame. Installation requires the drilling of (2) 7/32 holes in the enclosure and (2) 7/32 holes in the door. The door stop may be adjusted to stop the door at any angle up to 90°. When the door is closed, the door stop retracts to an out of the way position. To operate properly, the door must open horizontally and the width of the enclosure must be 16 inches or more. Hardware is supplied for installation.

Door Stop – PROGRAM 1087

Opening angle	X	Y	minimal door width
90°	140	180	403
105°	120	166	389
120°	110	150	373
135°	100	146	369
in case of other variations $y = x + >40$

LID SUPPORTS

- **MADE OF 300 SERIES STAINLESS STEEL AND BLACK ANODIZED ALUMINUM**
- **ORIGINAL PATENTED DESIGN**
- **PREVENTS OVER-OPENING**
- **WILL NOT STRETCH OUT OR BREAK**

The automatic Hatch Holder is great for holding hatch doors, table leaves, lids etc. Simply pop it into place after unlatching and easily push or pull to close. The retaining cable saves over-opening on many models. It's easy to install and made of durable stainless steel.

Originally designed for use in boat hatches, the Hatch Holder is useful in many other applications - bait tanks, battery boxes, electronics consoles and more! And, because it is made of quality stainless steel and black anodized aluminum fittings to precise specifications, you can be assured that it will not stretch out or appear over used. Easy to install. (US Patent Nos. 3570043/272,718)

SHORT-SMALL

7/16" diameter 300 series stainless steel spring. Approx 6-1/4" long. Suitable for supporting approx. 10 lbs. Retaining cable to prevent over-opening.

PN 0304-1 Bracket with support and cable

SMALL

7/16" diameter 300 series stainless steel spring. Approx. 8 1/2" long. Suitable for supporting approx. 10 lbs.

PN 0045 Bracket with L-shaped support
PN 0045-1 Bracket with L-shaped support and cable
PN 0045-2 Bracket with support as shown above
PN 0045-3 Bracket with support and cable
PN 0080-1 Car and track with L-shaped support and cable
PN 0080-2 Car and track with support and cable

MEDIUM

9/16" diameter 300 series stainless steel spring. Approx 10" from pivot point to pivot point. Suitable for supporting approx. 45 lbs.
